

Anas DADI

DevSecOps / SRE Engineer - Cloud Architect

Big Data and Cloud Computing engineer with several years of experience in multicloud architecture, Kubernetes, security, observability and data/AI systems. Based in Paris; open to hybrid and fully remote roles.

Paris, France

Technical Skills

Code & Scripting

Reactjs, HTML, CSS, Bootstrap, AWS CodeCommit
Java, Spring (Boot, mvc, ORM, JPA, Hibernate, Data, Cloud)
Java ee, Python, Flask, django, Powershell
JavaScript, Nodejs, NestJs, bash
Golang, C/C++
PHP

Plan

Jira, UML, Slack
Confluence, Merise

Build

TravisCI, Maven
Jenkins
GitlabCI, Azure DevOps
AWS CodePipeline, Github Actions
AWS CodeBuild

Test

Trivy
tfsec
Owasp Zap
SonarQube

SEC

Release

Sonatype NEXUS, Helm, DockerHub, Gitlab Container Registry
JFrog, Azure Container Registry, AWS Container Registry

Deploy & IaC

GitlabCD, Spinnaker, flux CD, Jenkins
AWS CodeDeploy, Ansible, terraform
Octopus Deploy

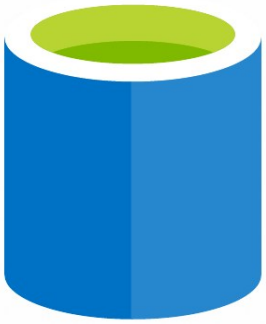

Operate& SEC

AWS EC2, kubernetes, ExternalSecrets
Azure vm, GCP GKE, Vault
DO, AWS EKS, Keycloak
Docker, Azure AKS, Cert Manager
Vagrant, Docker Swarm

Monitor

VICTORIA METRICS, Grafana, Kibana
Zabbix, Prometheus, ElasticSearch
Opsgenie, AlertManager, FluentBit

Storage & Databases

Big Data

HDFS, mapreduce, spark, Pig, Hive
zookeeper, Kafka

Databases

MySql, MongoDb, Sqlite, Firebase
PostgreSQL

Software-Defined Storage

Ceph, GlusterFs, OpenZFS, OpenEBS

Cloud Providers

aws, vmware vSphere
GCP, AZURE

Professional Experiences - 1

BNP Paribas | DevOps / SRE - Infrastructure & Orchestration Expert

Aug 2024 - Present | Paris, France

Operating multicloud orchestration and production platforms across IBM Cloud, AWS and Azure.

Roles and responsibilities

- Manage multicloud orchestrators across IBM Cloud, AWS and Azure.
- Design and implement scalable, highly available Kubernetes clusters.
- Develop and maintain CI/CD pipelines for microservices.
- Implement infrastructure as code with Terraform and Ansible.
- Build and maintain Apache Airflow DAGs for scheduled and event-driven data and infrastructure workflows.
- Automate ServiceNow incident creation, enrichment and resolution to reduce manual work and speed up response.
- Lead N3/L3 production troubleshooting across Go, Java, Python and Node.js microservices, including root-cause analysis and remediation.
- Define SLIs and SLOs, monitor SLAs and write incident-resolution runbooks.
- Develop in-house tooling that sends context-aware security notifications to the relevant teams.
- Build security pipelines with SAST, DAST, code-quality gates and end-to-end tests.
- Optimize container resource allocation and performance.
- Establish and enforce cloud security practices.
- Design monitoring and alerting with Dynatrace, Prometheus, VictoriaMetrics and Grafana.
- Automate routine operations and incident-response procedures.
- Plan cloud capacity and optimize costs.
- Implement and manage service mesh solutions.
- Develop custom Kubernetes operators for business needs.
- Lead the adoption of GitOps for infrastructure management.
- Manage secrets with HashiCorp Vault.
- Tune database performance and implement replication strategies.
- Conduct security audits and vulnerability assessments.
- Mentor junior team members in DevOps and SRE practices.
- Work with development teams to improve application performance and reliability.
- Apply chaos engineering to improve system resilience.
- Manage and optimize CI/CD artifact repositories.
- Maintain documentation for systems and operational processes.
- Implement machine-learning workflows for predictive analytics and anomaly detection on system metrics.
- Use AI-driven incident prediction to reduce downtime and improve reliability.

Focus areas

Cloud & orchestration

- IBM Cloud, AWS, Azure
- Highly available Kubernetes
- Terraform, Ansible, GitOps

Delivery & security

- Microservices CI/CD
- SAST, DAST, quality gates
- HashiCorp Vault, artifacts

Production reliability

- N3/L3, ServiceNow, SLIs/SLOs
- Dynatrace, Prometheus, Grafana
- Capacity, chaos engineering

Data & AI

- Airflow DAGs, Kubernetes operators
- Anomaly detection
- Predictive incident models

Professional Experiences - 2

Coral-io / Stellantis | Cloud / DevSecOps Architect

Sep 2023 - Aug 2024 | Paris, France

Led large-scale migration from on-premises data centers to AWS and Azure.

Roles and responsibilities

- Lead the migration of thousands of projects from on-premises data centers to AWS and Azure.
- Plan cloud migrations with cross-functional teams and establish landing zones.
- Assess risks and compliance with AWS Inspector and Azure Security Center.
- Design cloud infrastructure with HCP Terraform, AWS CloudFormation and Azure Resource Manager.
- Train teams in cloud technologies and DevSecOps practices to support CI/CD adoption.
- Keep stakeholders informed through status dashboards and reports.
- Build and maintain secure CI/CD pipelines across cloud accounts and environments.
- Integrate security tools and automate infrastructure-as-code documentation.
- Manage AWS services including EC2, ELB, RDS, ECS, ECR, Lambda, Route 53, S3, CloudWatch, CloudTrail, IAM, KMS and AWS Shield.
- Administer Azure Resource Groups, Key Vault, Disk Encryption Sets, Network Security Groups, Azure Functions and AKS.
- Write detailed runbooks for each stage of the cloud migration.
- Implement disaster recovery with Azure Site Recovery and AWS Backup.
- Optimize cloud costs and benchmark performance regularly.
- Audit data-security compliance with AWS Audit Manager and Azure Policy.
- Implement AWS multi-account and Azure multi-tenant strategies for security and resource management.
- Manage Azure SQL Database, Cosmos DB, Azure Blob Storage and Azure File Storage.
- Build Power BI and AWS QuickSight dashboards to track migration performance and security.

Focus areas

Migration strategy

- Thousands of projects
- AWS and Azure landing zones
- Cross-functional coordination

Cloud architecture

- HCP Terraform, CloudFormation
- Azure Resource Manager
- AWS multi-account / Azure tenancy

Security & governance

- AWS Inspector, Azure Security Center
- Secure CI/CD and IaC documentation
- AWS Audit Manager, Azure Policy

Recovery & insight

- Azure Site Recovery, AWS Backup
- Cost and performance reviews
- Power BI and QuickSight

Professional Experiences - 3

Coral-io / Icade | DevOps / SRE Consultant

Aug 2022 - Aug 2023 | Paris, France

Modernized application delivery and operations, including a move from vSphere to Kubernetes.

Roles and responsibilities

- Design, build and manage CI/CD systems with GitLab CI and Jenkins for regular deployments.
- Containerize FastAPI, Django, Flask, Laravel and Symfony web projects.
- Migrate workloads from vSphere to Kubernetes clusters on LXD hypervisors.
- Implement monitoring and logging with Grafana, Prometheus, VictoriaMetrics, Zabbix, Loki and Promtail.
- Manage and optimize Redis, PostgreSQL, Elasticsearch and MariaDB.
- Manage secrets with HashiCorp Vault and External Secrets.
- Configure distributed storage with Rook Ceph, GlusterFS, Longhorn and OpenEBS.
- Write automation scripts in Python, Bash and Go.
- Analyze data and automate reporting with Python and Jupyter Notebooks.

Focus areas

Delivery

- GitLab CI and Jenkins
- FastAPI, Django, Flask
- Laravel and Symfony

Kubernetes & storage

- vSphere to Kubernetes on LXD
- Rook Ceph, GlusterFS
- Longhorn and OpenEBS

Observability

- Prometheus, VictoriaMetrics
- Grafana, Zabbix
- Loki and Promtail

Data & automation

- Redis, PostgreSQL, MariaDB
- Elasticsearch, Vault
- Python, Bash, Go, Jupyter

Professional Experiences - 4

Avito.ma / Frontier Digital Ventures | DevOps / Cloud Engineer

Sep 2021 - Aug 2022 | Paris, France

Operated AWS infrastructure and EKS while building data and machine-learning workflows.

Roles and responsibilities

- Manage AWS infrastructure with Terraform and CloudFormation.
- Automate server configuration with Ansible.
- Deploy and operate large-scale applications on Kubernetes and Amazon EKS.
- Optimize AWS RDS, DynamoDB and Elasticsearch databases.
- Manage secrets with AWS Secrets Manager and HashiCorp Vault.
- Set up monitoring with CloudWatch, Grafana and Prometheus.
- Write automation scripts in Python and Bash.
- Create Kubernetes operators for Traefik IngressRoute and PrometheusRules.
- Implement Apache Kafka for real-time data streams.
- Apply machine learning to detect anomalies in logs.
- Develop and deploy image-recognition solutions.
- Implement object detection with YOLO and SSD models.
- Build recommendation engines to personalize the user experience.
- Create real-time analytics dashboards for marketplace insights.
- Use NLP and machine learning to improve search relevance and item categorization.

Focus areas

AWS platform

- Terraform and CloudFormation
- Kubernetes on EKS
- RDS, DynamoDB, Elasticsearch

Operations

- Ansible, Python and Bash
- CloudWatch, Grafana, Prometheus
- Secrets Manager and Vault

Streaming & AI

- Apache Kafka streams
- Log anomaly detection
- YOLO and SSD object detection

Marketplace insight

- Recommendation engines
- Real-time analytics
- NLP search and categorization

Internships

DXC Technology — Sale AL Jadida, Morocco
End-of-study internship - 4 months
15 February 2021 - 15 Juin 2021

Implementation of the solution of IT Monitoring and automation of Reporting BI solution using Zabbix, VMware ESXI, Kubernetes, Helm, Docker, Zabbix, Grafana, Elasticsearch, Fluent-bit and Kibana.

Abboud Foodstuff Trading — Rabat, Morocco
Engineering Internship - 2 months
01 July 2020 - 31 August 2020

Design and Development of a web stock management application using Nestjs for the backend, ReactJs for the frontend and Figma for the UI/UX.

ENSET Mohammedia — Mohammedia, Morocco
Application Internship - 2 months
1 octber 2020 - 1 December 2020

Working on an Artificial Intelligence Chatbot using Python(Flask, Tensorflow) on Backend, Heroku for Deployment, and React-native for mobile development.

Barid-Al-Maghrib — Rabat, Morocco
Initiation Internship - 1 month
1 july 2019 - 1 august 2019

- Development of a furnitures management web application using Flask-python.
- Management of a team of three developers to develop a web project using php.

French	Advanced

Education

ENSET Mohammedia
CS Engineering, Big Data & Cloud Comoputing - 3 years
09/2018 - 07/2021 — Mohammedia, Morocco

CPGE- Omar ibn Alkhattab
Physics and Engineer Science - 2 years
09/2016 -07/2018 — Meknes, Morocco

Tarik Ibnou Ziad High School
Mathamitaics Science A - 3 year
09/2013 - 07/2016 — Azrou, Morocco

Certificates

- Hadoop Foundations
- Advanced Python
- GCP Data Lakes & Warehouses
- GCP Streaming Analytics
- Huawei Security
- Huawei AI
- TCF French Advanced
